Invitations have been extended to Burdett, Grassy Lake, Winnifred and all other Districts are also heartily invited to come and join in with us at this Annual Beautiful Memorial Service to our Fallen Soldiers, our Herbie Deal, who died in defence of "Liberty, Home and Freedom."

They died for you and me, they died in the hopes that by their Valor in giving their lives to their Country's service, that we being freed from our enemies might henceforth earnestly strive to live "Pure and Godly lives."

"No greater Love hath man than this  
That he lay down his life for another"

### Bow Island News

Services were held in All Saints' Church last Sunday by the Rev. Leacroft and notice was given that three Confirmation Classes would be held, on Wednesday evening the 9th, one on Thursday evening the 10th, and one on Friday evening, the 11th, the Confirmation Service being on the Sunday following, the 13th. May at 11 o'clock in the morning, there will be no Evening Service, as the Bishop and the Rev. Leacroft will return to Taber in the afternoon, to hold evening service at Taber

The All Saints' Ladies' Aid met at the home of Mrs. Kientsche on Wednesday afternoon, after the usual business, the hostess served a dainty lunch

We are very sorry to hear that Mr. H. Long of Purple Springs is very ill at the Medicine Hat Hospital, after an operation last week

The local store-closed at noon on Wednesday and this will be continued throughout the summer months

Rev. F.R.B. Leacroft to hold Confirmation Class

Confirmation Classes will be held on Wednesday, Thursday and Friday anyone wishing to be confirmed will meet at the All Saints' Church at 7:30 p.m. on each of the above mentioned evenings

Confirmation Service by the Bishop of Calgary in All Saints' Church Bow Island

Bishop Pinkham of Calgary assisted by the Rev. Leacroft will hold a Confirmation Service in Bow Island on Sunday May 13th. at 11 a.m. at All Saints' Church.

### To Celebrate 'Victoria Day'

May 24th. "Victoria Day" is a "Day" that should not be forgotten in Canada or any part of the British Empire. The birthday of the most beloved ruler of modern times "Queen Victoria" during whose reign the principles of "Love and Tolerance" were so exercised as to unite solidly the many parts of the Empire, "Victoria Day" will be celebrated in Bow Island this year as a "Sports Day" and a good time is assured if the weather is favorable. We hope everyone in town will receive this "Day" and that the people from the country will be far enough advanced in seeing to make this "Day" a Real Celebration

(Contributed)

### TOWN OF BOW ISLAND

### Typhoid Epidemic Very Serious In Quebec Town

MASONVILLE, Que.—Slight improvement is reported in the typhoid situation here. The condition of two or three of the critical cases is more favourable, although W. R. Oliver, the provincial member who was taken ill with the disease a few days ago, is reported to have suffered a setback. To add to the difficulty under which the physicians, nurses and assistants are working to combat the epidemic, the electric lighting system of the village broke down temporarily. All assistance has been rushed to the stricken district

Appeals were made in all the Churches throughout the township for domestics, orderlies and drivers to assist the doctors who have been at work night and day, tending the 165 patients

## Bow Island News

"Desperate Trails" as shown in the Monarch Theatre last Saturday night was well worth seeing. The pictures were of interest all the way through. Anyone who has once seen Harry Carey the Great Western Character, will want to see his acting again.

The Comedy "Cheerful Credit" caused waves of laughter, the "Wonder Dog Howlers" was splendid in its tricks. The pictures were well and clearly shown which makes them of added interest and value, and were good clean wholesome subjects and had nothing in them that the most careful of parents would object to their children seeing.

## Blot on Civilization Repulsive Hanging of Picariello and Mrs. Lassandro Not Sentimentalism Wanted But Even Balanced Justice

Emil Picariello and Mrs. Florence Lassandro were hanged

Wednesday morning, 2nd. May

The general public was disgusted and sickened to hear that buty men had, while they enjoyed all the comforts of ease and wealth themselves, had calmly decreed the "Violent Deaths" of two hapless human beings, one of whom was a little, wretched, distraught woman, so fragile that she only weighed about 115 pounds.

When we read that even the Jailers went "White faced" when the wretched little victim Mrs. Lassandro pleaded to them and asked "Is there no one here who has any pity?" when it came over the Jailers to go "white" then there is something radically wrong with our Man-made Laws, they are following too much the Jewish or old Moslem Law which said "An Eye for an Eye and a Tooth for a Tooth," but a better set of Laws were enjoined when Christ taught Christianity—who taught the better Laws, do you think, Christ or Moses?

Here is a Big difference in two Judges dealing our their Man-made Laws in Cases of Murder that they had before them

A murderer of a Victoria Cross hero, was sentenced by Justice D.A. McDonald to life imprisonment while Picariello and Mrs. Lassandro were hanged, their two lives taken for one.

(A fuller comparison of these Cases will appear next week.)

## Pyrohe Cure is Claim of Toronto Doctor

TORONTO—Production of evidence that, contrary to the general belief of practitioners, pyrohe has and can be cured, created a sensation here at the general meeting of the Academy of Dentistry.

The fellows of the Academy of Medicine had been invited to the meeting to hear a review of the "nine years' research work of Dr. Harold Box of this city, which, it is claimed, has culminated in the discovery that pyrohe, or chronic periodontitis, can be successfully treated.

## Plans Channel To Keep St. Lawrence Free Of All Ice

MONTREAL—Armed with a plan to have a 90 foot channel in the St. Lawrence river kept free of ice throughout the winter months so that navigation may proceed uninterrupted to the points of Montreal, Sorel, Three Rivers and Quebec. Demetri Joasowicz, Humanian engineer and inventor, is now negotiating with the Montreal harbor commissioners. The St. Lawrence river will be open for Navigation next winter: that is sure, remarked Mr. Joasowicz. The cost is comparatively little and Montreal will be made the first port of the continent.

## Crofters leaving Hebrides for Canada

(Continued from Front Page)

"The history of the romantic island never held a more suggestive date than April 21, 1923. The broken circle of the Bay of Stornoway over which the white gulls eternally wheel, with their plaintive calls, will witness on that April morning the spectacle of a human drama more tremendous in its setting and emotional appeal than any since the first Norseman coveted Lewis.

"But that is only part of the story. Hundreds of Lewismen in the years before the war had left the island by the mail steamer for Glasgow, although the occasions had never justified the special call of an Atlantic liner.

"This year, however, even the new adventure, with all its scope, is not adequate, to meet the impulse for emigration which has swept over the Hebrides. Apart from the scheme, many Lewismen—hundreds, I am told—are contracting privately for being taken to the Colonies.

"And away down in South Uist and Barra, the continuation of the island, forty families are selling out, lock, stock and barrel, and changing their home to an islanders' colony in the greater west.

"The prime mover in this migration is Father Macdonnell, a Roman Catholic Priest, who has engineered more than one large movement of crofters in the islands in recent years. Forty families, as I have said, have taken the step, and more are now contemplating the giving up of their crofts.

"For weeks a common sight in Uist has been the roping of stock. There are about 4,000 people in Uist and Barra, and crofts are being so rapidly relinquished that the threat of complete depopulation looms up menacingly. Uist and Barra some of these days may become as empty as a coral island in the South Seas. That is no figure of speech. The little black cattle will not sell, the horses that are bred will not pay their transhipment fees in market prices, and the wool the famous wool, produces no more money than would buy provender for the chicken run."

According to the chronicler, it is the young people who are burning for Canada.

## Winnifred News

From Our Own Correspondent

### Winnifred Farm House is Destroyed by Fire

Five completely destroyed the house and contents of the home of J. Hartner, living southeast of here on Thursday morning. Mr. Hartner had been working in the fields all morning and, on returning at noon saw smoke coming from the house. When he opened the door flames burst out and the fire had made such headway that nothing could be done to save the building. Harvey and Will Morris, who were passing at the time, came to the assistance of Mr. Hartner and with their help he was able to confine the fire to the house and prevent its spread to the barn and granary. The cause of the fire is unknown as no fire had been in the stove since early morning; but it is thought that matches on the window sill might have been heated up through the double windows and lighting caused the blaze.

Mrs. Roy Colthore returned from Medicine Hat Hospital last week, mother and baby enjoying the best of health.

Mrs. Nellie left last week for Jenner, where she had been employed. Mr. Nellie is stopping at the home of Mrs. Frank Baker for the summer.

Miss Anna Lawson, teacher of Maxwell School left April 27th, for Rosemary, Alta. to teach a one grade school.

Mrs. Jas. Larsen arrived home April 28th, after spending the winter in Edmonton the guests of her sisters Mrs. Thompson and Mrs. Clark.

The Service at the Union Church last Sunday was very unique and impressive, the Oddfellows held their annual Service, the Hebrideans also attended in large numbers, and everybody thoroughly enjoyed the service.

The musical selections interspersed throughout the service were excellent, Rev. Wm. Rodger was at his best, giving a very appropriate sermon for the I. O. O. F. and it was highly appreciated.

A Special Mothers Day Service will be held at the Union Church Sunday May 13th, at 3:30 p.m. the choir will have an extra musical programme.

Friends of Mr. Frank Baker, sympathize with him in his recent illness, he was taken seriously ill on April 28th, and they were obliged to take him to Medicine Hat Hospital where he could receive the very best medical attention.

Mr. E. Erickson's many friends are glad to learn he has recovered from his recent illness and is able to be on duty as usual.

Mr. Luigi Castellieri's friends will regret to hear he is suffering from a relapse of Quinsy.

Mrs. L. C. Gow returned from Medicine Hat Hospital April 27th, in fairly good health, which is welcome news to her many friends.

Miss Mable Barth and Thelma Long motored down from Medicine Hat on Sunday to visit their parents.

Mrs. Jas. (Aunt's) friends will be glad to hear she is recovering steadily from an attack of tonsillitis.

The first April rain fell on Sunday April 29th. It began to rain about 2 p.m. and heavy showers fell during the afternoon and night. Farmers were getting very anxious as the rain was very dry and badly in need of moisture. This rain will be doing good for a couple of days, but they don't mind being held up for a little while, to get the moisture as it is of great value for this district this spring.

Mr. Oth Dohd is reported indisposed with a very bad head and arm it was found necessary for him to go to Medicine Hat Hospital to receive medical help.

### Attach your Name to News

## Motor Transport Through West Coast Archipelago

1. Good like idea showing up from inland summer area. 2. The "Motor Prime" after leaving.

THE magnificent chain of fine motor roads with a wind through the Salix and the Canadian Pacific Rockies in Vancouver and points as the southern British Columbia border. These through the western states of America, reaching as they do the coast of the Canadian and American National Parks, need no introduction to the world of motor-roads. Direct mile of roadway, especially through the Canadian Parks where it has, in many places, been cut out of solid rock and at steep angles, has been built with an eye to easy travelling and scenic grandeur, and from early spring until late in the fall's continuous stream of automobiles, hearing pleasure (and is every-where on the coast) point along the highway. No where else can the motorist obtain such a long trip through such ever changing scenes of natural beauty.

During the past few years, it has become quite the thing to motor through vacation time, and those who choose this way of holidaying are numerous in their choice of a "hunting ground" British Columbia and the Rockies are not the least of the "game" preserve being travelled through here once a year, never to have anything done with the country. No less attractive on account of its

good roads, scenic properties and tourist accommodation is Vancouver Island. The city of Victoria at the southern extremity of the island is the hub from which the "round the island" and shorter roads radiate and the open coast, with its brown, rugged and other rugged trees is the goal of all who have the desire to see the coast. The thousand gardens of Vancouver and other rugged trees is the goal of all who have the desire to see the coast. The thousand gardens of Vancouver and other rugged trees is the goal of all who have the desire to see the coast.

The west coast ports nearby. The Canadian Pacific Railway Company has this year put into service a new automobile ferry, the "Motor Prime," a motor driven vessel which operates between Ballingrain and Victoria; and which, with a capacity for fifty automobiles and well appointed accommodation for 300 passengers, runs twice daily. The route traversed by the ferry is skirted by islands, some of which are rich in extent, others gas like islands thrusting up from smiling seas, making the waterway a succession of pictures in which the most famous of scenic hangings succeed one another. The ferry about twice is also seen from the ferry to a motorist standing as it does in a mist of dazzling snow and the footfalls of the mailmen.

## How Is Your Subscription ?

### New Canadians Start For Canada

A Busy Scene at the Liverpool Dock.

THE facilities for handling outward bound passengers at the Canadian Pacific dock at Liverpool, England, are so perfect and speedy as any in the world. As will be seen from the picture above of future Canadian citizens boarding the "Montcalm," the traveler pass from the street and railway station leads to waiting rooms on the dock side, and crossing the bridged wharf, board the ship by the saloon deck where they are received and assigned to quarters. Their baggage is handled from below and with despatch. A travelling belt carried operated by an electric dynamo eliminates the necessity of many noisy and slow moving winch hoists which, when used and not too carefully operated, are the cause of many trunks and boxes being damaged, so that the baggage is carefully loaded and distributed almost as quickly as the passengers are received. It is usually planned to have all the passengers aboard at least half an hour before sailing time, and the gangway is down for their reception about three hours before that time unless special trains are scheduled to arrive earlier.

As for other dockside facilities, the Montcalm commenced to take on coal and discharge cargo, mostly package freight, at six o'clock of the morning of a recent arrival. By 2.45 in the afternoon she had taken 1,000 tons of coal into her side bunkers, and at the same time she was unloading 1,700 tons of freight, this being discharged by 7.15 the same evening.

### Taking the Roof of Canada.

The glacial rock as a movie location.

"AND just then," said Otto Paul Schwarz, of Switzerland, in describing a trip to the Canadian Pacific Rockies, "we saw a huge bergschlund."

"And did it bark at you?" he was asked. "Or do they bleat?"

"Ah, no. A bergschlund is not a bird. It is a huge crevasse where the ice has slipped down the rock wall and cracked. The next stumbling block we came to was a chimney. This is a hard business. It means bracing your back against one wall and your feet against the other and doing what you call on this side 'the chimney' till you get to the top. It is a great life, this one of mountain climbing, especially higher up where the glaciers are. Imagine a river of ice with a depth of something like 1,000 feet. Great crevasses reach down. It seems to the howls of the earth, peaks and miniature rise from its uneven surface and glacial in the same which can never warm them; a giant grow, while force, irresistible, stupendous, with an alluring fascination which the lovers of the outdoors cannot deny."

The picture above was taken on the "roof of Canada" near Banff, and the huge glacier which the party is traversing will, in years, perhaps, help to make fertile the prairie plains. "Traveling at the rate of about four inches each day, nothing can withstand it, but another generation of millions will have come and gone before the ice on which the climbers stand will have found its way down to the warmer valleys where it will melt; and in the meantime, snow from the even higher peaks will breeze and pack and so, so far as the present day world is concerned, the life of this wonderful natural force is without end."

## WINTER WHEAT and RYE

Experimental Farm Note

Southern visitors to the Experimental Station at Beaverlodge, Grande Prairie, are surprised at the degree of success met in the culture of autumn-sown cereals. Rye is almost perfectly hardy, having come through the trying winter of 1921-22 with no killing to speak of, notwithstanding the lack of snow protection until late January. Even the Turkey Red Winter Wheat came through with half a stand, when at the University of Alberta in Edmonton every plant of Winter Wheat had been killed.

Winter wheat seems to succeed better at Beaverlodge than at other Experimental Stations in the West. It has been observed at Beaverlodge that when killing occurs it is usually on the most exposed and driest spots; suggesting that, perhaps, the semi park character of the country, the fairly heavy type of soil prevailing and the usually steady snow blankets, may be possible factors in the case.

The average plot yield of Rye in the five cropping seasons, 1918-22 inclusive, has been 43 bushels 17 pounds per acre. Some of these crops have been grown on summerfallow and some on early breaking. The only trouble with the fallow system of growing is that they sometimes develop a troublesome rankness of straw. To overcome this, and at the same time to economize labour, various practices have been resorted to, such as cross-drilling the Winter Rye on spring grain a month after the latter is sown, or drilling the Rye in autumn on the stubble of the spring grain.

Perhaps the best use of Rye in the North is to provide early pasture to cut down the winter-feeding period and to provide hay when other crops fail. When not needed for hay it may be left to ripen grain. Five pecks per acre is the prescribed quantity of seed, and sowing has usually been done in the middle of August.

Turkey Red Winter Wheat, grown under the same conditions as the Rye, has produced during the five successive years, an average of 29 bushels 25 pounds of grain per acre. While the average has not been so high as the average yield of spring wheat, it has matured more safely. Sown the middle of August, it is usually cut during the latter half of the August following. The necessity of carrying seed over is one drawback of the crop. Another is the possibility of winter-killed patches giving weeds a chance to occupy the land. This can be obviated by drilling in betimes on such patches an early variety of Spring Wheat, such as Ruby. Six to eight pecks is the usual seeding of Winter Wheat. For early August seeding five or six pecks will suffice. Some big crops of Winter Wheat have been grown in the district, field yields as high as forty-five and fifty bushels per acre being reported.

Besides the Turkey Red, other varieties are under test, though comparisons are not available. In 1921, a new White Wheat called O.A.C. No. 21, yielded 47 bushels 28 pounds per acre.

W.D. Albright—Superintendent  
Dominion Experimental Sub Station  
Beaverlodge, Alta.

## Burdett News

All farmers are now busy on the land and a good deal of seeding has been done and some plowing, the rain last Sunday will sure help out with the plowing as some spots were very dry.

The farmers that raised some five last year, are now finding it to get their Spring work done—very few are buying any feed—later on the early sown oats will help out considerably.

Horses and cattle in the majority of cases are not looking as well as they usually do at this time of the year and their numbers are not so large as usual.

All lines of business are very dull and lots of people cannot help complaining.

### Fear School May Have To Be Closed

BURDETT.—The school board was to have held a joint meeting of the trustees and teachers on Thursday evening, but owing to sickness of the secretary and some other members the meeting was postponed.

It is stated that the trustees are in financial difficulties. Their treasury is empty, and the bank refuses to advance sufficient money to complete the year's operations, as it has done in previous years. If money cannot be raised from some other source, or a compromise cannot be made it will probably mean that the school will have to be closed before the end of the term.

### WHAT'S THE ANSWER?

TABER.—Lethbridge sends an opponent of the Farmer government to Edmonton; Taber a Farmer member, a friend to it. A government dry spell is given by the city opposed by Taber, a friend of the city, or a compromise cannot be made it will probably mean that the school will have to be closed before the end of the term.

"The Review" suggests that some "Wag" in giving the "Bottle of Hair Oil" is hinting that the people of Taber should "Keep their Hair on" and not get Mad about it.

## Crofters Leaving Hebrides For Canada

Fear of Depopulation Looms Up In The Hebrides

Following on the heels of the Clydesmen who passed through Montreal last week destined for points in Ontario, a large party of Crofters from the Hebrides will reach Canada at the end of this month. This party will number 500 or more, largely recruited from the Island of Lewis. They will travel by the liner Metagama, of the Canadian Pacific Service, which is due to leave Stornoway on April 21st, and reach Quebec on April 28th. For this special purpose the Metagama will sail through The Minch, the channel between Lewis and the Isle of Skye, anchor off Stornoway and there receive the men and women who will leave their native land.

Economic conditions in the Hebrides are driving these people to seek homes in Canada, and the exodus is regarded in the light of a tragedy. Recently a journalist visited the island, and after his stay wrote:

## Notice of Intention of Council of Burdett Village To Pass Early Closing By-Law

NOTICE is hereby given that a Petition has been presented to the Council of the Village of Burdett for the passing of "The Early Closing Act" praying for the passing of the following Closing By-Law:

The Reeve and Council of the Village of Burdett enact as follows:  
(1) Upon and after the 1st day of June A.D. 1923 all classes of shops within the Village of Burdett, where and wherein goods are exposed and offered for sale by retail (except the trades or businesses mentioned in the schedule to said Act) and each of them shall stand shall remain closed on each and every day of the week between 5:30 o'clock in the afternoon of each day and 5:00 o'clock in the forenoon of the next day with the following exceptions:

On Saturdays and on the day immediately preceding any day defined as a holiday under the Interpretation Act of the Province of Alberta such shops shall be and remain closed from 9 o'clock in the afternoon until 5 o'clock in the forenoon of the day following Sunday or such holiday with the further exception of the three (3) days immediately preceding Christmas day on which days such shops may be opened from 5 o'clock in the forenoon until 10 o'clock in the afternoon of such days.

This By-Law shall not be deemed to apply to Barber shops or Garages.

This By-Law shall take effect on the 1st day of June A.D. 1923.

Notice is hereby further given that objections to the petition presented to the Council praying for the passing of any such By-Law on the ground that such Petition is insufficiently signed or otherwise affecting the validity or sufficiency thereof must be filed with the Secretary-Treasurer of the Village of Burdett on or before the 15th day of May A.D. 1923; and that if no such objections are so filed before the said date the Council will forthwith proceed to pass the said Closing By-Law.

Reeve

## Family Life Can Restore Sanity

MONTREAL.—In another quarter century or so, pretty near the whole civilized world will have become or is to become insane if nothing is done to stop the rapid increase in mental derangement, is the opinion of Dr. A.H. Desloges, director of asylums of the Department of Public Health of the Quebec government. The past year, the doctor said, has been a record one in the number of cases of insanity treated, not only for the Province of Quebec, but through the whole world. The reason he believed, in common with most alienists, to be the extraordinary intensity and excitement of life today.

"Nobody works or plays, or does anything normally these days," the doctor says. "When we work we work like mad; when we play we play like mad; whatever we do, we do it with all the intensity of a crazy enthusiasm."

"Then there is the general and economic shock of the war, which has its effect everywhere and which has largely given rise to this condition. It has left a tendency to lose all sense of balance and proportion, both in work and play."

"What should we do to remedy it?"

We must get back to sane family life. At present, we have nothing but the life of Clubs, of Hotels, of Dance Halls, of Cafes, never any family life anywhere."

## Steered By a Dead Man

NEW YORK.—The motor boat "Traveller," steered by a dead man with a bullet in his chest, was caught by longshoremen as she emerged from beneath a pier in the Hudson river, and headed for open water at full speed.

Its lone occupant lay on his back across the steering wheel, his weight steadying the rudder. A pistol and 2 cartridges were in the bottom of the craft. The absence of empty shells led the police to believe the man had been murdered.

## Here and There

An addition to the Canadian Pacific Montreal-Toronto train service is a nightly train each way, making six trains every night between the two cities. The increase was found necessary on account of the heavy tourist traffic to Montreal from the West.

The opinion of Hon. T. D. Pattullo, Minister of Lands of British Columbia, is that "Canada can absorb at least 500,000 people annually, and this number can come on indefinitely. There is no limit to the requirements of the country. As many as we can get are wanted."

Halifax.—The many friends in Halifax and Dartmouth will be pleased to learn of the success of Edward Everett Beck, formerly of Dartmouth, but now residing in Vancouver. He has just been appointed manager to the Hotel Vancouver. Mr. Beck is a son of Mrs. Beck-Judard, Dartmouth. He has three brothers, Charles A. Dartmouth; Harry, Middle Musquodchuic, and Archibald in Winnipeg.

Going to Vancouver from Halifax, where he was a stockbroker, Mr. Beck has seen the Hotel Vancouver grow from a small brick building to present fifteen storey fireproof structure. Famous men and women from all parts of the world have been cared for by the smiling official during his service with the company.

Quebec.—A beautiful booklet which describes the past and present of the Chateau Frontenac has just been issued by the C. P. R. and has been sent by the thousands of copies, to all the leading hotels of Europe and the United States. It is unquestionably a work of art, replete with illustrations, and contains a graphic history of the "grand chateau." Not only this, but the book is a piece of French Canadian history from the first landing of Jacques Cartier to the battle on the Plains of Abraham, and from that time on. The cover is very appropriately adorned by a picture of the Count de Frontenac, with the Chateau Frontenac in the background. The booklet gives interior and exterior views of the hotel, and affords a description of Quebec, "the ancient portal of the new world."

Winnipeg.—Great interest in the increasing facilities for the storing and handling of grain at the head of the lakes was evinced by Charles Murphy, general manager of the Canadian Pacific Railway, who returned from Port William, Ireland, where he had been on an engagement of at least 4,000 bushels in the storage capacity during the coming summer, and it was hoped the new equipment would be in working order in time to take care of the next crop. Two private gravel elevators were to be erected and the buildings of the railway's own co-operative company is to be enlarged he stated. One construction office was already on the ground and construction would be resumed as soon as weather conditions permitted.

The initial shipment of cattle since the embargo removal was recently imported by the Hon. W. P. Mothers, well known Minister of Agriculture, in the C. P. R. stock yards, Montreal. They were stalled Ontario cattle from along the Canadian Pacific west of Toronto, with the exception of one carload of Western cattle, the ablest being in the best condition despite the fact that they had had a 24 hours run from North Bay. The minister expressed the opinion that the cattle being shipped were of the first quality.

Nova Scotia is endeavoring to arrange an "old home" month during July or August of 1923, and it is expected that many from distant parts of Canada and the United States will visit the towns of their origin during the festival period set apart.
